VEIN IS TAPPED IN THE NEW YORK

Ledge Matter Made Its Appear- Number of Weak Spots Were Noticeance Sunday Night.

MANAGER CALLED TO MINE

TETRO SAID TO HAVE \$200,000 IN SIGHT.

That conditions are becoming interesting at the New York Bonanza company's Park City property is very evident. Manager Wilson went up to the mine Sunday and returned Monday night. On receipt of a telephone message from Superintendent Ferguson yesterday afternoon he decided to go out again this morning

go out again this morning
He stated, however, that there was no strike to report.
While he was at camp the cross-cut from the shaft entered the vein on the 400-foot level. The material which came from the first round of holes showed that the vein was very highly mineralized, but it had not been penetrated far enough to determine what conditions were going to be, Mr. Wilconditions were going to be. Mr. Wil-son said the cross-cut would be con-tinued through to the footwall and if ore did not make at that point drift-ing would begin at once. He also said that conditions on the 300 level looked

that conditions on the 300 level looked most encouraging, but further than that he did not feel justified in going.

"We have no wish or intention of hiding anything in the New York," said Mr. Wilson, "but we do not wish to make statements that might prove misleading in the light of future development. When the mine shows anything worth telling about, the news will certainly be given out. I anticipate though, that if ore in any quantity is developed in the near future the news will be out ahead of me. That is usually the case where the development of a property is being watched as closely as is that of the New closely as is that of the New

Yesterday afternoon G. B. Blakele and George E. Forrester, of the au diting committee, submitted a repor which is now on file in the company' office, stating that they had carefully gone through the books of the company and found them to check in every particular. The stock books showe particular. The stock books showed that the number of shares issued, can celled and reissued corresponded precisely with the number of shares in the corporation and was therefore correct. The receipts of the year, including cash from sale of treasury stock and the from sale of treasury stock and the last assessment, amounted to \$39,309.30 while the disbursements amounted to the same sum, not including an over draft of \$526.38. The committee wen into the business affairs of the company very thoroughly and found every pany very thoroughly and found every thing as it should be.

TETRO HAS \$200,000 IN SIGHT.

That Is the Estimate of an Engineer Who Sized Up the Strike.

neer Who Sized Up the Strike.

A discovery was made in the Tetro
orkings on Monday which proves beond question that the new ore chute is
ontinuous from where it was first cut
of a height of over sixty-five feet. At
the top of the thirty-five foot raise a
bug hole," or narrow cave, was encounred. It was found to reach to an addional height in the fissure of about thirfive feet and was large enough for a
han to force his way up through it.
amples taken at the top and along the
des showed the ore to be of the same
eneral characteristics as where it was
ling opened up below.

A mining engineer who was in the mine
londay figured up from the amount of
ork that had been done in the new ore
ody, including the drifts, cross-ruts and
lise, and by giving the value of the work

CALIFORNIA-COMSTOCK.

Former Insists Consolidation Is Pending.

llows:

"There is a proposition to consolidate to California with the Comstock on an en basis. If you are in favor of this case send your stock to H. G. Fisher, sistant secretary, to be so voted, and a ceipt will be forwarded to you for the me and the stock or substitute stock coording to the vote) returned to you due time.

"W. I. SNYDER, Secretary."

be briefly review what action has been had up to date in the matter—a review that shows concludively that all negotiations have been broken off and amount to nothing.

Early in July, after Morris Dusseldorf, through inability, had been temporarily stock and the board here for the companies were commenced. Before the end of August officials of both companies, subject to ritification at the hands of the shareholders, sit agree to consolidate on the robiders, sit agree to consolidate on the robiders of the Company, by an overwhelming majority, registered themselves as opposed to the arrangement and the Caifornia company, replying the terms of consolidation proposed, demanded an accounting for ores alleged to have been extracted from California ground, together with a request for a joint survey of the pressults.

While the limit of time given the Constock to make its reply does not expire until Priday mixt, at the dictation of A. Hanauer, it, president with a legal battle would surely result.

An Array of Facts in Report of Geological Survey.

THREE LARGE PRODUCERS

SEVERAL IMPORTANT NEW ENTERPRISES.

important copper producing states, and it is notably in the Bingham camp that development has been most rapid." that development has been most rapid." Such is the statement made by the Geological Survey in its annual report on the production of copper in the United States, in the calendar year 1902. Cantinuing, with reference to the output of Utah, the report says:

"The largest producers are the Highland Boy Mining company and the United States Mining company, the last having begun production in 1902. In the spring of 1903, these were producing at the rate of 1,200,000 pounds, 700,000 pounds, and 800,000 pounds, respectively, or at the rate of over 35,000,000 pounds pounds, and 800,000 pounds, respectively, or at the rate of over 35,000,000 pounds per annum. In the same district the Tintic Miping and Development company is opening the Yampa mine and will build smelting furnaces during the present year. The Boston Consolidated Mining company has also developed large bodes of ore at depth, but has not yet decided upon the erection of a smelting plant. The Columbia Copper company, which has been successful with a small concentrating plant, will build a large mill. The concentrates are all sold to the smelters in the disare all sold to the smelters in the dis-

build a large mill. The concentrates are all sold to the smelters in the district.

Bingham Company.

"The Bingham company has control of the Bingham and Tintic mines and of the Dalton & Lark and Brooklyn mines, into which the Dalton & Lark tunnel, 7,000 fet long, is being driven in order to unwater them. The smelter possesses four furnaces. The company is also working under an option the Eagle & Blue Bell property at Tintic.

"The United States Mining company reached the stage of active production late in 1902. The company owns the Commercial mines at Bingham, and draws its siliceous ores from the Centential-Eureka mine, and extensive development has been undertaken in the Old Jordan vein. The company has completed a well-equipped smelting plant with five furnaces, which it is expected will reach a production of 1,000,000 pounds per month. Since January 1, 1900, there has been expended \$1,706, 184 of which \$992,987 was for the construction and operation of the smelter and its auxillary works and \$313,-177 in the purchase of new properties, in the development and equipment of the mines, and in the payment of interest of the mine baly-Judge, 100@48, 600@48.912, seller 60. still unpaid upon buillon al. baly-West, 15@439; 25@439.15. Total, 40 shipped being estimated at \$69,319.

"The Highland Boy company, controlled by the Utah Consolidated company, treated in 1902, 167,713 tons of ore, which yielded 11,840, 431 pounds of copper, 160,915 ounces of silver, and 19.078 ounces of gold, as compared with a tonnage of 167,823 tons in 1891, yielding, respectively, 9,043,967 pounds of copper, 176,331 ounces of silver, and 13,983 ounces of gold. Having carried over from 1901, 2,183,683 pounds of copper and 62,909 ounces of silver, the company sold 14,004,114 pounds of copper, 223,824 ounces silver, 19,083 ounces of pounds of copper, 223,824 silver, 19.083 ounces of gold, the average prices realized being 11.91 cents per pound for copper and 52.62 cents for silver. The total earnings were \$1,992.049, and the expenses were \$1,142,049, the net earnings

to come.

A man who had looked into the proposition stated yesterday that the Swansea's salary list, with its mines closed down, amounted to more than did that of the Daly-West, with its hundreds of employes and large business to look after.

DALY-WEST-DALY CONNECTION. Rumor of Trouble Between Compan-

A story is now being exploited to the effect that serious trouble is imminent between the Dalv and Daly-West companies because of the latter having passed over its lines into Daly territory, where connections with the latter's workings have been made. To get the straight of the matter, both Manager Rood of the Daly-West were questioned yesterday. Mr. Rood said that he had not thought of mentioning the matter at all, but as the subject had been brought up he was ready to admit that the Daly-West had invaded Daly territory and connected with its workings.

"Bul," said Mr. Rood, "I do not anticipate any trouble over it. No ore has been taken by the Daly-West for the very good reason, if for no other, there was none. ies Officially Denied.

Manager Bamberger of the Daly-West ras very frank in his statement. "The connections spoken of were made two or hree months ago. Superintendent Kirby ras running a long drift on the lower evel of our property to the east in what is known as the north fissure in the interio and Daly mines, and he got into Daly ground. No gore of any consequence w just where they were at that depth re was no intention on our part to will y trespass, and as no harm or damag resulted. I feel quite sure that noble between the companies will fol

Utah Stocks in Boston. (Special to The Herald.)

Ore and Bullion. Ore and bullion settlements in this city yesterday, as reported by McCornick & Co., amounted to \$88,700, as follows: Sil-ver, lead, gold and copper ores, \$48,200 base bullion, \$40,500.

Metal Market. Silver, 50%c per ounce. Copper, 12%c per pound; New York, \$13.62% to \$13.75 per 100 pounds. Lead, \$3.500 per 100 pounds; New York, \$4.40.

Mining Notes.

Receipts at the Taylor & Brunton sampler yesterday consisted of eleven carloads of ore from Tintic.

James W. Neill went north last evening on a short experting trip. He expects to return tonight or tomorrow.

President Treweek of the Wabash went out to the Park yesterday morning. Intending to be at the mine for a day or two.

Another excursion will be run to Tin ic on Sunday next for the benefit of those who wish to spend the day amon the mines. President McNeill and General Manager D. C. Jackling of the Utah Copper com-pany are expected out from Colorado again tomorrow.

Assessment No. 2.

gold, the average prices realized being 11.91 cents per pound for copper and 52.62 cents for silver. The total earnings were \$1,992,049, and the expenses were \$1,142.049, the net earnings being \$850,000. The costs included \$242.621 for mining, \$497,346 for smelting, \$239,963 for freight and refining, \$83,891 for ore and matte purchases, \$42,249 for development, and \$35,979 for general and miscellaneous expenses. After paying \$534,000 in dividends and writing off \$58,333, the company added \$257,667 to a previous balance of \$649,469, making a total surplus of \$907,136.

Newhouse Enterprises.

"Outside the Bingham camp, several important new enterprises are being undertaken. Among these is the Newhouse mines and smelters, which company is to take over the Cactus properties of Mr. Samuel Newhouse, seven miles from Frisco, in southern Utah. A main shaft is being driven and a tunnel 5,800 feet long has been begun. It is proposed to erect a concentrating plant capable of handling 1,500 tons of ore per day, and to build a large smelting works. It is estimated that the proposed to erect a concentrating plant capable of handling 1,500 tons of ore per day, and to build a large smelting works. It is estimated that the proposed to erect a concentrating plant capable of handling 1,500 tons of ore per day, and to build a large smelting works.
